Filmmaking from Script to Premiere with Freshi™ Media

This class begins with a completed script, allowing the participants to immediately get into the substance of a project. The group decides on the genre of film they want to produce: comedy, drama, sci-fi, action adventure or horror. Using basic video cameras and editing software, they produce the film, integrating simple special effects, sound effects and a musical score. They learn camera angles, film etiquette and vocabulary, as well as how to use digital film tools. These learned skills should translate outside of the class to their home video camera and computer so they can continue with their digital storytelling. The final class will premiere their movie for the benefit of family and friends - a fun and interactive way to wrap a film production!

For ages 7-12 years.
